Media) - Certificate

PROJECTS

Prism — *Inward facing office employee and data management App*

Built the UI from the ground up using Vue.js and Vuetify, and was a part of a small team working out UX/UI flow and Backend organization.

Worked closely with the lead developer on managing and connecting the backend with GraphQL and Apollo.

Created components: employee time card/clock, request calendar, data charts/graphs, project tables, layered data displays and more.

Pomodoro — *Pomodoro timer for a more efficient work day*

Built a timer for scheduling productivity using React

Created an analog clock using CSS positioning and transform

<https://github.com/CassadyBlake/pomodoro>

Shot Clock — *A list app, with expiring tasks*

Built using Ruby on Rails

Set up a user login interface

Built a to-do list with tasks expiring 7 days after creation

<https://github.com/CassadyBlake/shot-clock>
